

J & E Hall Limited

Mission - We work together to deliver exceptional service, products, and solutions for our customers.

Vision - To be a leading international refrigeration engineering company, admired for our employees who provide innovative products and solutions.

- Develop and introduce initiatives to promote recruitment, retention, and development of employees.
- Invest in research and product development to bring new products to the market which drive the promotion of environmentally conscious refrigerants, products, and systems.
- Reduce the overall carbon footprint of business activities by identifying key areas and implementing appropriate solutions.
- Continue to build relationships and understand customer requirements to promote innovation and collaboration to align with their business needs.
- Utilise the manufacturing capabilities of Daikin group companies to meet the requirements of our customers business needs.
- Improve the efficiencies of Manufacturing Processes by identifying and selecting critical suppliers to manufacture key components and equipment and 'Right First Time' mentality across the business.
- Minimise waste generation at source and facilitate repair, reuse, and recycling over the disposal of wastes.
- Build an international network for sales of industrial products and further support engineers in the UK to support sales network.
- Continual integration of Company Global targets and reporting through Daikin initiatives (Green Procurement, Green Energy) to reduce the overall impact of business activities.
